> About QuHacks

Established in 2016, QuHacks, Maryland's largest high-school hackathon, brings young coders in the DMV area together to give them the opportunity to demonstrate their creativity and coding abilities.

During the hackathon, students develop an idea and bring it to life through code. Previously, students have created websites, robots, and much more!

Last year, we had a **record** high of **175 attendees**.

As we prepare for our 10th anniversary of QuHacks, your potential sponsorship will help ensure our success!
